

Dear Students and Colleagues,

Health control measures against the novel coronavirus pneumonia

The University has been working on appropriate counter-measures in response to the continuing spread of the novel coronavirus pneumonia. Further to the announcement by the President on 30 January 2020, the following measures will be implemented at the entrances of the University campuses, along with additional cleaning and disinfection measures already taken place:

- All students and staff are **REQUIRED** to present their student/staff cards at the card readers at the campus entrance checkpoints. To avoid causing congestion at the checkpoints, students and staff are advised to complete the online health declaration form ([HERE](#)) before they arrive at the checkpoints. Access will be denied if the student/staff has not completed the health declaration form, or if he/she has a fever or has travelled to Mainland China in the past 14 days.
- All students and staff are **REQUIRED** to undergo temperature checking at the campus entrance checkpoints. Persons with a fever will not be allowed to access the campus. He/She should seek medical advice immediately.
- Manual checking of student/staff cards at the campus entrance checkpoints will be suspended.

Frontline security staff will be required to follow the above protocol strictly.

We would like to thank the University community for its understanding and cooperation on the health control measures.
