

Dear Colleagues,

### **Access for visitors**

Please be advised that **with immediate effect**, a two-tier control on the access to campus is being implemented:

#### **1<sup>st</sup> tier: Security control**

The arrangements described in our email dated 10 January 2020 concerning “Campus access control for visitors to Kowloon Tong campuses” still apply:

- For a visitor coming on foot, pre-registration via the visitor registration system (VRS) or on-the-spot manual registration for verification by the campus security if the visitor has no QR code still apply.
- For a visitor driving in, pre-registration of the vehicle registration number must be carried out.

#### **2<sup>nd</sup> tier: Health control**

- All visitors are required to complete a health declaration form as attached (paper form) at the campus entrance checkpoints. This paper form will be replaced by the online declaration once the VRS can link with the online health declaration system.
- All visitors are required to undergo temperature checking at the campus entrance checkpoints.
- Entry will be DENIED if the visitor:
  - has travelled to Mainland China in the past 14 days;
  - has a fever cough, diarrhoea, vomiting or flu-like symptoms; or

- has in close contact with anyone diagnosed with or suspected of any respiratory disease.

We thank everyone for your kind cooperation.
